

Working with your stocking templates.

Print all 4 templates and this instruction sheet.

There is a measurement indicated at the top of each template piece.

Your stocking pieces should print out at about the right size.

The measurement indicated does not need to be exact...the stocking can really be any size and/or shape you want. This is just my favorite size and shape.

Cut out each template piece and tape together matching up the "hash" marks and referring to these instructions.

I recommend you then trace this pattern onto poster board and cut it out so you can use it over and over again.
